

I have been looking forward to the traffic reporting and weather in the Miami area. The services we have now are poor, not in English or do not report on all areas. The traffic condition in Miami is a mess just about anytime. This service is only provided by broadcast radio in the morning and afternoon and only between commercials, disk jockey blabbering and music. I have sat dead stopped in traffic when the traffic radio is telling me that I am moving along at the speed limit. Please let full time services such as that offered by XM radio go forward. If broadcast radio did what the public wanted they would not be threatened by a service that pays very close attention to what their customers want. Thank you.
